

Toolbelt API

Developer utility API · 80 endpoints

Zero AI cost · fast · deterministic

Every boring-but-essential utility your app needs, behind one fast API: QR & barcodes, invoices, data conversion, auth, i18n and a Japanese text pack.

QR & Barcodes

qr, qr/bulk, qr/wifi, qr/vcard, barcode
(Code128/EAN/UPC/PDF417)

Documents

invoice (SVG), markdown, markdown/toc, html/strip

Data & JSON

convert (JSON/YAML/CSV), json/format, json/diff, json/get

Hashing & crypto

hash, hash/bulk, encode, base32, crc32, cipher/caesar, morse

Auth & tokens

jwt/decode, jwt/sign, bcrypt/hash, bcrypt/verify, password, token

IDs & generators

uuid, uuid/v5, uuid/validate, nanoid, ulid, passphrase, lorem, random

Japanese

jp/convert (zenkaku/hankaku/kana/romaji), jp/slug

Internationalisation

translit, slug, slug/intl, phone (E.164), postal, currency/convert

Validators

validate/email, creditcard (Luhn), iban, pii/redact, password/strength

Text tools

text/case, text/stats, text/diff, text/similarity, html/entities, number/words

Color & design

color/convert, color/contrast, color/palette, og-image

Numbers & units

number/format, number/base, number/roman, units/convert

Date & time

time/convert, time/diff, time/zones, age, date/add, date/business-days

Geo & network

geo/distance, cidr, ip/info, mime, gravatar

Web & dev

url/parse, url/query, regex/test, useragent/parse

EXAMPLE — POST /v1/qr

```
curl -X POST "https://{HOST}/v1/qr" \  
  -H "X-RapidAPI-Key: YOUR_KEY" -H "Content-Type: application/json" \  
  -d '{"text":"https://example.com","format":"png"}' --output qr.png
```
